Organize pages in Adobe Acrobat

You can delete, create, reorder, and insert pages in a PDF file by doing the following:

1. Click the Edit menu. The Edit left pane is displayed.

2. Click Organize pages.

3. In the working pane, thumbnail images of all the pages in the document are displayed. This enables you to preview the content in each page.

4. You can delete one or more pages by doing the following:

5. To delete a single page:

6. Select the page and click the Delete button. The page is deleted.

7. To delete multiple pages that are in consecutive order:

8. Click the first page, hold the SHIFT button pressed, and then select the last page.

9. You can press the DEL key on the keyboard or click the Delete button. The pages you selected are deleted.

10. To delete multiple pages that are not in a sequential order:

11. Select the first page, hold the CTRL button pressed, and select the other pages you want to delete.
