Short Descriptions Authored

Manually Authored: Short Description-1 (June/23/2025)

- The data which is collected by Active Health System and stored in the Active Health System log, is logged securely and kept isolated from other operating systems and customer data.
- The collection and logging of Active Health System data does not consume Host resources.
- The oldest data is replaced with the new data when the Active Health System Log is full.
- When downloading the Active Health System Log, you can also add your contact information and when you send the Active Health System data to HPE, you must agree to have the data used for analysis, technical resolution, and quality improvements.
- The data collected is managed by following the privacy statement, link here:
<https://www.hpe.com/info/privacy>.

AI Authored: Short Description-1 (June/23/2025)

- The Active Health System securely stores collected data in the Active Health System Log, separate from the operating system and customer data.
- Data collection and logging do not use host system resources.
- When the log is full, the oldest data is automatically overwritten by new data.
- The log can be downloaded in under five minutes and sent to a support professional for issue resolution.
- Users may include contact information when sending the log, and shared data is used by HPE for analysis, technical support, and quality improvements, in line with their [privacy policy](#).
